

## A CHARACTERIZATION OF MULTIPLIERS IN THE HEDBERG–NETRUSOV SPACES

*A. I. Parfenov*

We expose a criterion of the membership of a function in the space of pointwise multipliers between the Hedberg–Netrusov spaces. The criterion is stated in terms of a pair of discrete weighted inequalities. Connections of the criterion with the problem of rectifiability of Lipschitz surfaces are established.

*Key words and phrases:* Hedberg–Netrusov space, Lizorkin–Triebel space, pointwise multiplier.
