

SOLVING A PURSUIT PROBLEM IN HIGH-ORDER CONTROLLED DISTRIBUTED SYSTEMS

M. Sh. Mamatov and Kh. N. Alimov

We study a pursuit problem in controlled systems with high-order distributed parameters. Sufficient conditions are obtained for the possibility of the completion of the pursuit by the finite difference method. We also give computer realizations of the problem by parallel computing.

Key words and phrases: pursuit, pursuer, evader, pursuit control, evasion control.
